COMMENT

In 1939 52 irrigation objects were constructed in the Uzbek SSR including the 270 km. long Fergan Canal. The Vakhshskaya irrigation system which irrigates 22000 hectares of new land and supplies permanently water for 72000 hectares of old land, has been put in operation. At the Gissarskaya Valley a 41 km. long irrigation canal was built in 50 days.
